Windshield washer fluid distribution device for motor vehicles
Founded in 2010, **Dalpa Industries** is a Romanian company whose main activity is manufacturing and selling the world’s first device that produces and distributes windshield washer fluid directly into motor vehicles’ containers.

**Dalpa Industries** consists of a team of young professionals who aim to create new buying culture among consumers through continuous product innovation and quality services.
Dalpa is a registered and patented trade mark in Romania and in the European Union.
Dalpa is an innovative device, unique in the world, that mixes concentrated windshield washer fluid with water from local networks, to obtain a windshield washer solution.
Dalpa facilitates instant delivery of windshield washer fluid to motor vehicles’ washer fluid containers.

Dalpa software allows for paying simultaneously for the petrol and the windshield washer fluid.

Overview

**Functionality**: device is easy to use by drivers/consumers;

**Invoicing**: the device software that is fully integrated with the fuel pump allows for easy payment;

**Distribution**: reduced transportation and storage costs due to super-concentrated solution;

**Practicality**: Perfectly suits the design of fuel distribution stations, car parks, etc.

**Minimum investment costs** for fuel stations, quick break-even (less than 1 year);

**Impact on the shelves**: space saving, allowing more product diversification;

**Sustainability**: the device is eco-friendly, does not require individual packaging (in cans, bottles, etc.) - which promotes ethical behavior towards the environment, a trend that is embraced by customers.
